

DAMPIERRE EN BURLY NUCLEAR POWER PLANT

07/07/2015

In July 2014, GÉOTEC was selected by EDF to carry out 4-year recognition assignments for the future Ultimate Rescue Diesel facility in DAMPIERRE, in the frame of the post-Fukushima geotechnical recognition procurement.

These assignments include 4 core drillings 20 to 30 m deep, 4 pressure meter probings 20 to 30 m deep, and 4 SPT analysis probings 15 to 30 m deep, complemented by laboratory tests.

Estimated budget is €147,712.
