

Our assets

Client focus and Partnership

GÉOTEC analyses all projects thoroughly, whatever the scale and location, and provides client-specific solutions with appropriate survey and investigation programmes. We supervise and monitor all stages, from setting up the initial campaign to delivering the final report. We can also handle the design and execution of infrastructure works as part of a separate service package until the project is completed.

Dialogue and Reactivity

Our guarantee to you :

Reactivity

Flexibility

Effective control throughout the project implementation:

In-situ testing

Laboratory tests

Interpretation and design reports

Supervision of works execution

National and regional scalability

Working with GÉOTEC means accessing comprehensive nationwide equipment for *in-situ* soil investigation and laboratory tests while enjoying responsive service from our staff in our local offices.

Sustainability

GÉOTEC's robust finances enable us to follow-up on your projects continuously and provide guidance in the long term.
