

## A comprehensive chain of expertise

### IN-SITU TESTING

### SOIL AND WATER ENGINEERING

Our nationwide network of regional agencies and offices provide comprehensive soil and water engineering services covering various fields, such as geology, geotechnics, rock mechanics, hydrogeology, soil pollution, and structural diagnostics.

### IN-SITU GROUND INVESTIGATION EQUIPMENT

A wide range of investigation instruments and drilling rigs (80):

- Geotechnical surveys;
- In-situ* testing;
- Instrumentation;
- Water tests.

### RIVER AND OFFSHORE EQUIPMENT

A wide range of investigation instruments and drilling rigs for river and offshore sites.

### LABORATORY TESTING

Our 4 laboratories in Dijon, Bordeaux, Paris and Lyon are equipped to run all soil mechanics tests.

### STRUCTURAL DIAGNOSTICS

We have created a structure diagnostics division to extend our range of expertise and offer solutions to meet our clients' expectations, namely in terms of rehabilitation and restructuring projects.
